

## Master of Information Technology Innovative Information Systems—2IS

**Application for September 2020**

The **2IS** Master program is designed for Bachelor students in IT aiming to expand their knowledge on innovative information technologies. It is an original MIAGE program taught in English for international students.

**2IS** proposes a unique and broad perspective on innovation in a 2-year program:

- ▶ Innovative software solutions such as technologies for web services, next generation business intelligence, artificial intelligence, data analytics and internet of things.
- ▶ Innovative software development methods such as agile management and collaborative design
- ▶ Innovation and entrepreneurship in strategy and management
